WORK EXPERIENCE

MOMENTUM, INC. (B2B Firm in the A/E/C Industry)

Seattle, WA

Marketing Manager

Nov 2015 – Dec 2025

Branding and Content

- Built a people-first brand that repositioned Momentum from “vendor” to strategic partner, resulting in early engagement with clients before RFPs were issued.
- Reframed sales and marketing strategy from commodity competition to mission-driven partnership, leading clients to engage in strategic planning during sales meetings while competitors focused on pitching services and pricing.
- Activated the brand through research-driven, trust-building content that highlighted industry trends, client wins, and end-user success—earning Momentum a reputation as a go-to resource for strategic planning.
- Developed a high-impact proposal strategy supported by strong templates, an organized content library, and a process that translates sales insights into compelling client-success narratives, enabling delivery of winning proposals.

Marketing Automation and CRM

- Built a unified HubSpot automation framework that streamlined both sales and marketing operations—expanding sales outreach capacity, improving lead capture, and enabling transparent tracking and accountability across the entire pipeline.
- Designed behavior-driven marketing automation workflows that adapt to how leads interact with sales outreach, email campaigns, and website content, delivering personalized nurture sequences that move prospects forward automatically.
- Established policies, processes, and shared data structures that enforced collaboration and information flow between teams, giving sales real-time insight into lead activity and enabling marketing to optimize campaigns based on measurable engagement patterns.

Outside-the-Box Innovative Wins

- Rebranded an internal market study into the Momentum Location Intelligence product, meeting an unmet market need and driving high conversion rates to major design-build projects. This opened the door to larger clients, bigger projects, and significant revenue and headcount growth.
- Developed a custom mapping and analytics tool that visualizes employee drive and transit times across potential workplace locations, solving a recurring client decision-making bottleneck and helping close eight figures of previously stalled opportunities. This tool is written in Python and draws data from the Google Distance Matrix API.

THE SPEIDELL GROUP

Lynchburg, VA

Special Projects Manager

(Part-Time, Concurrent with Other Roles) May 2007 – Jun 2015

- Automated a Fortune 500 client’s quotation and proposal templating process, reducing turnaround time from weeks to days.
- Translated complex technical knowledge into compelling marketing copy and shot commercial photography for flagship products.

SUNGMIN, PLAYOLA, CHOO-CHOO TRAIN PRIVATE SCHOOLS

Seoul, South Korea

Kindergarten Teacher

Jun 2011 – July 2014

COLLEGIATE TIMES

Blacksburg, VA

News Reporter

May 2010 – Jun 2011

- Reported the news for an independent college newspaper, publishing 3–5 stories per week while studying full time.
- Managed sources and conducted interviews to get to the hearts of stories, providing a valuable perspective into current events for students and residents of the community.

VOLUNTEERING

WEST DUWAMISH GREENBELT TRAILS

Seattle, WA

Volunteer Conservation Advocate

June 2022 – Present

- Built a modern, responsive WordPress site (WDGTrails.org) to promote the greenbelt's history, conservation efforts, recreation opportunities, and guided hikes.
- Designed posters and promotional materials to increase awareness and attendance for guided hikes and conservation initiatives.
- Supported conservation and habitat restoration initiatives through invasive species removal, native plant restoration, and trail maintenance, protecting the ecosystem of Seattle's largest contiguous forest and surrounding neighborhood.

EVERGREEN MOUNTAIN BIKE ASSOCIATION

Seattle, WA

Trail Builder

May 2015 – Aug 2023

- Participated in volunteer trail building and maintenance with a focus on sustainable design practices, erosion control, and long-term trail durability.
- Organized and led volunteer work parties restoring and maintaining trails in remote areas of the state, coordinating logistics, safety, and on-site instruction to support high-quality backcountry trail stewardship.

PYSWARMS (PARTICLE SWARM OPTIMIZATION RESEARCH TOOL)

Remote

Open Source Software Developer

Summer 2018

- Contributed code, tests, and performance improvements to an open-source Python optimization library, demonstrating strong technical fluency and comfort working with data, APIs, and analytical tooling.
